DETAILED ACTION

Election/Restrictions

1. Newly submitted claim 10 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: That claim 10 directed to a product rather than the method as originally claimed in claim 1. It is clearly that the product subject matters in the newly added claim 10 is independent from the invention originally claimed invention because inventions of claim 10 versus claim 1 each have a separate status in the art (i.e., product versus method) and clearly have a separate field of search, and the search required for the product is not necessary required for the method. Further, the product can be made regardless to whatever process or by another and materially different process instead of the process of claim 1. Note that the Office generally does not permit shift of elected subject matter (see section 819 of the MPEP).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 10 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

2. This application is in condition for allowance except for the following formal matters:

The claim:

It is requested product claim 10 to be cancelled.

Further, Applicants' cooperation is requested in correcting any errors of which applicant may become aware in the claims and or specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
